

## Peer Review Evidence

<https://github.com/PSStudent01/2026-cax-216/pull/2>

l)

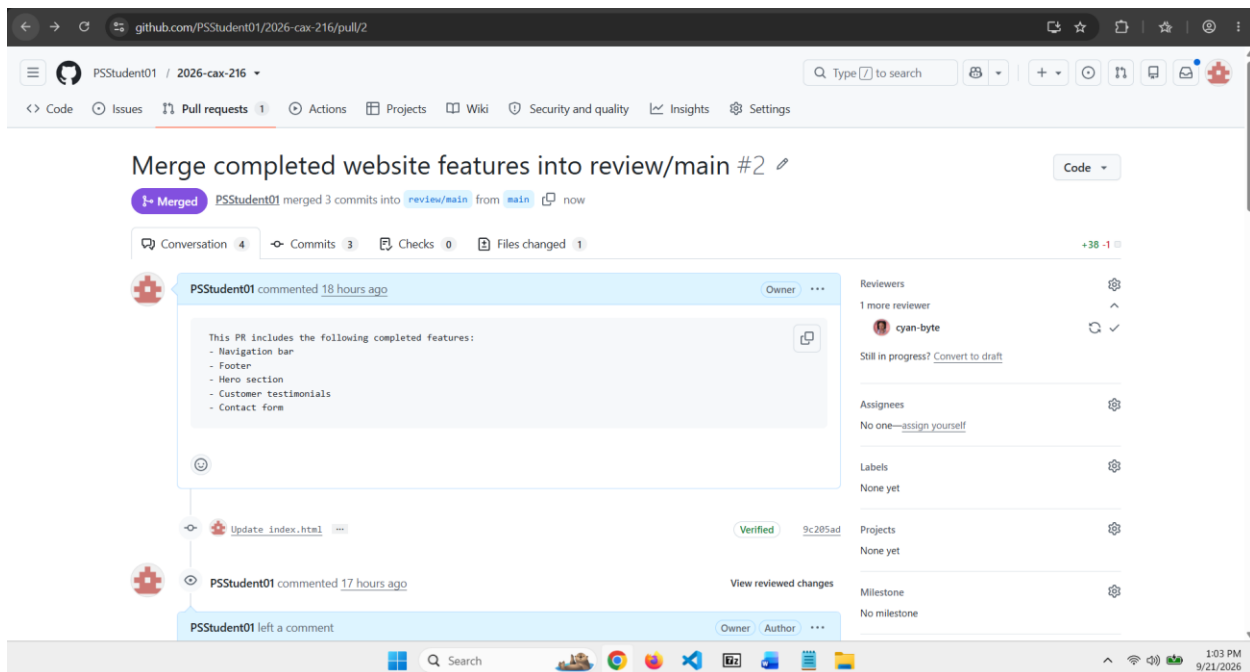

### **My PR Reviewed and Approved by Alisha Upton (cyan-byte):**

Alisha reviewed my "Merge completed website features into review/main" PR (#2), which included my navigation bar, footer, hero section, testimonials, and contact form. She left an inline comment on the testimonials section, noting that using semantic "section" tags instead of generic "div" tags was good practice for accessibility and SEO, and suggested I add a class to the section for future styling flexibility. She then formally approved the pull request.

### **Then I proceeded to merge main branch into review/main branch:**

After receiving her approval and confirming there were no conflicts with the base branch, I merged 'main' into 'review/main' to complete the pull request workflow...
